

EMEN

Coaching & Mentoring for better support for migrant entrepreneurs

Within its three years duration the European Migrant Entrepreneurship Network (EMEN) aimed to connect and strengthen the migrant entrepreneurial support ecosystem across Europe. As a "Community of Practice (CoP), EMEN is about networking and connecting organisations that support migrant entrepreneurship to facilitate mutual learning in three essential areas:

- (1) Coaching and mentoring
- (2) Microfinance
- (3) Professionalisation of migrant entrepreneurs' associations and diversity management in chambers of commerce.

Join & contact EMEN

EMEN's communities of practice are open to all organisations supporting migrant entrepreneurs.

If you are involved in supporting migrant entrepreneurs and would like to join EMEN, you can:

check our website at
www.emen-project.eu

send an e-mail to

Coaching & Mentoring for Migrant Entrepreneurship in Europe

By organising events, topical workshops or online seminars Social Impact guided the CoP on the area “coaching and mentoring” through the process. We brought together experts and practitioners that work with migrant entrepreneurs. Besides the enhanced exchange between European experts in the field, EMEN also dedicated resources to research and comparative analyses. The complete list of publications is accessible on our website – www.emen-project.eu.

Among others you will find the following analyses on our website

- A comparative working paper related to the state of the art of coaching and mentoring schemes for migrant entrepreneurs.
- A list of key informants and stakeholders in the EU.
- A working paper on the needs of organisations offering coaching and mentoring for migrants.
- A case study approach comparing Refugee Entrepreneur Support Schemes in Europe.

Let's stay in touch!

Whereas the funding of the European Migrant Entrepreneurship Network ends in 2020, we are keen on sustaining our networks' efforts to further migrant entrepreneurs across the European Union. We are happy to share insights and continuing to connect the dots.

Social Impact's commitment to Migrant Entrepreneurship

Facilitating the exchange on a European scene as well as advocating for the cause of Migrant Entrepreneurship vis-à-vis EU institutions enabled Social Impact to further tailor and improve its services and diverse portfolio of programmes in that field:

- “**The Human Safety Net**” which is implemented by Generali and Social Impact Lab Munich: www.thehumansafetynet.org.
- The “**Ankommer**” programme is implemented by KfW Stiftung and Social Impact Lab Frankfurt.
- The “**Lotsendienst**” has been an integral part of the strong start up ecosystem in the federal state of Brandenburg. The project is funded by the federal state of Brandenburg and implemented by Social Impact Lab Potsdam.
